

In-Home Care for COVID-19+ Clients

HouseWorks has a specially trained workforce of Caregivers for COVID-19+ clients. We can have a Caregiver in the home quickly -- sometimes within 24 hours of contacting HouseWorks. We have taken every possible precaution to provide our clients with BetterCare at Home™.

About Our Caregivers

- Certified CNAs or licensed Home Health Aides; have nurse oversight and a daily check-in with manager
- Required to take their own temperature twice a day and self-check for COVID-19 symptoms.
- Required to take specialized training for working with COVID-19+ clients including rigorous infection control classes and how to properly put on and remove PPE.

Personal Protection Equipment (PPE)

Caregivers are required to wear the following PPE with every Covid-19+ client:

- Fit-tested KN95 masks
- Face shields or goggles
- Gowns
- Gloves

Household Requirements

- Client wears surgical mask when in the presence of others (unless a medical condition prevents it)
- Household members wear surgical masks when in the presence of the client
- Client and household members practice good respiratory hygiene
- Separate living space and bathroom space for the client
- Client's laundry is washed separately
- Client does not share eating and drinking utensils with others
- No visitors other than HouseWorks Caregivers
